Geethanjali College of Engineering and Technology (Autonomous)

Accredited by NAAC with A⁺ Grade; B.Tech. CSE, EEE, ECE accredited by NBA

Sy. No: 33 & 34, Cheeryal (V), Keesara (M), Medchal District, Telangana – 501301

Department of Computer Science and Engineering

Project – Progress Review Report (3rd Review) AY:25-26 April 2026

Date: _____

Batch Number:	CSE2526MNP-E9	**Section:**	CSE-E
Project Title:	Voice of Village: Fund Transparency & Issue Reporting System		
Project Domain:	E-Governance (Web-Based Application)		
Project Guide & Designation:	CH. Sandhya, Assistant Professor		

Student Details

Sl. No.	Roll Number	Student Name	Contact Number	Signature & Date
01.	22R11A05M9	Peraboina Uday Yadav	9959584865	
02.	22R11A05N9	Vonteru Satwik Reddy	7801041972	
03.	22R11A05M0	M. Manikanth Reddy	9392007048	

1. Problem Statement (Brief)

Rural areas face a significant lack of transparency and accountability in the management of government funds, where villagers are often unaware of allocations, expenditures, and project progress. Additionally, there is no efficient and accessible system for villagers to report local issues or track their resolution. This leads to mismanagement, delayed problem-solving, and reduced citizen participation in village development. Hence, there is a need for a digital platform that ensures transparent fund tracking and provides a structured issue reporting and monitoring system for effective rural governance.

2. Objectives of the Project

1. **To develop a web-based system** that provides complete transparency in village fund allocation, expenses, and budget tracking.
2. **To design an efficient issue reporting mechanism** that enables villagers to submit complaints and track their resolution status.
3. **To enhance accountability in rural governance** by maintaining clear and accessible records of financial transactions and development activities.
4. **To improve communication between villagers and authorities** (sarpanch/admin) through a centralized digital platform.
5. **To encourage active citizen participation** in village development by providing an easy-to-use and accessible interface.

3. Project Status

Percentage of Project Completed (till Review 3): 100%
Percentage of Project Work Pending (if any): 0%

3b. Status of Paper Publication

(Provide Journal / Conference details)

(Tick ✓ all appropriate items below)

4. System Architecture & Design Validation

Architecture Type: ☐ Monolithic ☐ Microservices ✓ Layered

Architecture Checks

✓ Clear separation (UI / Business Logic / DB)
✓ API design follows REST/standards
✓ Scalable design considered
✓ Loose coupling between modules

Architecture Diagram Finalized: ✓ Yes ☐ No

5. Technology Stack Proposed

Frontend	React.js	**Backend**	Express.js
Database	SQL	**Tools / APIs**	Postman, Git, Github

6. Code Quality Review

Maintainability

✓ Clean, readable code
✓ Functions < 50 lines (good practice)
✓ No hardcoded values

Standards & Practices

✓ Follows coding standards (PEP8 / Java conventions etc.)
✓ Meaningful variable/function names
✓ Code comments where necessary

Advanced Checks

✓ DRY (No duplication)
✓ Proper error handling (try/catch)
✓ Logging implemented

7. Project Modules Identified

Module Name	Description	Assigned Member	% of Completion
User Management	Handles user registration, login, authentication, and role-based access (Admin/Villager).	Satwik Reddy	100%
Fund Management	Manages government fund allocation, expenses, and remaining budget details.	Satwik Reddy	100%
Issue Reporting	Allows villagers to report issues like water, roads, electricity, etc.	Uday	100%
Issue Tracking & Status	Tracks complaints and updates status (pending/resolved/in-progress).	Satwik Reddy	100%
Admin Dashboard	Provides admin (sarpanch) with control over funds, issues, and reports.	Uday	100%
Frontend Interface	Develops UI using React.js for user interaction and responsiveness.	Uday	100%
Backend & Database	Handles server logic, APIs, and database (Node.js, MongoDB).	Satwik Reddy	100%
Testing & Validation	Performs system testing, debugging, and validation using tools like Postman.	Manikanth	100%

Integration Check

All modules integrated: ✓ Yes ☐ No **APIs/interfaces working:** ✓ Yes ☐ No

Data flow between modules verified: ✓ Yes ☐ No

Integration Issues (if any): _____

8. Working Prototype (Deep Verification)

System Type: ✓ Web ✓ Mobile ✓ Desktop ☐ ML ☐ IoT

Functional Flow Validation

Feature	Input Given	Output Observed	Status
User Login/Signup	Valid user credentials	User successfully authenticated and redirected to dashboard	✓ Pass ☐ Fail
Fund Details Viewing	Request to view fund data	Displays allocated funds, expenses, and remaining balance clearly	✓ Pass ☐ Fail

Issue Reporting	User submits complaint details	Issue successfully recorded with unique ID	✓ Pass ☐ Fail
Issue Tracking	Request to track issue status	Displays current status (Pending/In Progress/Resolved)	✓ Pass ☐ Fail

End-to-End Workflow Executed: ☐ Yes ☐ No **Real Data Used:** ☐ Yes ☐ No

Deployment

✓ Local ✓ Cloud ☐ Hybrid

URL / Access Details: _____

9. Code Quality Audit (Detailed)

Code Structure

✓ Proper modularization (functions/classes)
✓ Separation of concerns (UI/Logic/DB)
✓ Reusability implemented

Coding Standards

✓ Naming conventions followed
✓ Indentation & formatting proper
✓ No redundant/duplicate code

Complexity & Optimization

✓ Efficient algorithms used
✓ Time/space complexity considered
✓ Code optimized for performance

Version Control

✓ Git used
✓ Regular commits present
✓ Meaningful commit messages

Repository Link: _____

10. Testing & Validation (Deep Checks)

Testing Coverage

☐ Unit Testing
✓ Integration Testing
✓ System Testing
✓ User Acceptance Testing

Test Case Coverage

Total Test Cases: 06 **Covered Modules (%):** 90%

Sample Test Case

Test ID	Scenario	Input	Expected	Actual	Status
TC-001	User Registration	Verify user registration	Account created successfully	Account created and user redirected to dashboard	✓ Pass ☐ Fail

TC-002	User Login	Verify login functionality	User redirected to dashboard	User successfully logged in and redirected to homepage	✓Pass ☐ Fail
TC-003	View Fund Details	Request to view fund data	Fund details displayed correctly	Fund allocation, expenses, and balance shown accurately	✓Pass ☐ Fail
TC-004	Issue Reporting	Submit issue details	Issue recorded successfully	Issue submitted and unique ID generated	✓ Pass ☐ Fail
TC-005	Issue Tracking	Track issue status	Correct status displayed	Issue status (Pending/In Progress/Resolved) shown correctly	✓ Pass ☐ Fail
TC-006	Admin Update	Admin updates issue/fund	Data updated successfully	Changes reflected instantly in system	✓ Pass ☐ Fail

11. Debugging & Issue Tracking

Issues Log

Issue	Root Cause	Fix Applied	Status
Fund data not updating correctly	API response delay / improper state handling	Fixed API calls and improved state management	✓ Resolved ☐ Pending
Issue submission failure	Missing validation in input fields	Added proper form validation and error handling	✓ Resolved ☐ Pending
Issue status not updating	Incorrect backend logic mapping	Corrected status update logic in backend	✓ Resolved ☐ Pending
Login authentication error	Token/session handling issue	Implemented proper JWT authentication	✓ Resolved ☐ Pending

Debugging Approach

- ✓ IDE Debugger
- ✓ Logs/Tracing
- ✓ Breakpoints
- ✓ Monitoring Tools

Improvements After Debugging

- ✓ Performance improved
- ✓ Errors reduced
- ✓ Stability increased

12. Performance & Security Checks

Performance

Avg Response Time: 1 second

Load Handling: ✓ Tested ☐ Not Tested **Bottlenecks Identified:** ☐ Yes ☐ No

Security

- ✓ Input validation
- ✓ Authentication implemented
- ✓ Authorization controls

✓ Data encryption (if applicable)

13. Documentation Verification

Document	Prepared	Verified	Remarks
SRS	✓	✓	Complete
Design (UML/Architecture)	✓	✓	UML Included
Algorithm/Flowcharts	✓	✓	Clear
Database Schema	✓	✓	Normalized
Final Report	✓	✓	Reviewed
User Manual	✓	✓	Simple

14. Presentation & Communication

✓ Problem clearly defined
✓ Methodology explained
✓ Architecture diagram included
✓ Results & outputs shown
✓ Conclusion & future scope included

15. Demo Readiness

✓ Live demo stable
✓ Backup demo available
✓ All members can explain

16. Individual Contribution (Strict Check)

Member	Module Handled	Lines/Work Done	Explanation Ability
P.Uday	Frontend Interface, Admin Dashboard, Issue Reporting UI	Developed responsive UI using React.js, designed dashboard, implemented forms for issue reporting and data display	✓ Good ☐ Avg ☐ Poor
V. Satwik Reddy	Backend & Database, User Management, Fund Management, Issue Tracking	Implemented server-side APIs, authentication (JWT), database design (MongoDB), fund tracking logic, and issue management system	✓ Good ☐ Avg ☐ Poor
M.Manikanth	Testing & Validation, API Testing	Performed system testing, integration testing, validated APIs using Postman, identified and helped fix bugs	✓ Good ☐ Avg ☐ Poor

17. Innovation & Impact

Novel Contribution: A digital platform that combines village fund transparency with issue reporting and tracking, improving accountability.

Comparison with Existing Systems: Unlike traditional manual systems, it provides real-time fund details and online complaint tracking in a single platform.

Societal/Industry Relevance: Enhances transparency, citizen participation, and efficient governance, supporting smart village development.

18. Final Viva Readiness (Critical)

Check	Status
Project fully functional	✓ Yes ☐ No
All modules tested	✓ Yes ☐ No
Bugs resolved	✓ Yes ☐ No
Documentation completed	✓ Yes ☐ No
Demo stable	✓ Yes ☐ No

19. Mandatory Declarations

- ✓ Project is original work (no plagiarism)
- ✓ Code is understood by all team members
- ✓ System is ready for external evaluation
- ✓ Project documentation sample copy verified by guide
- ✓ Project exhibited at competitions

20. Additional Artifacts (Url to be mentioned)

GitHub: https://github.com/Satwik1229/Voice-Of-Village
Demo Video: _____
Deployment Link: _____

21. Reviewer (Internal Guide) Observations

✓ **Strengths:**

✓ **Weaknesses:**

✓ **Final Suggestion Before Viva:**

22. PO / PEO / CEP Mapping (to be marked)

Program Outcomes (PO): PO1 [ ] PO2 [ ] PO3 [✓] PO5 [ ] PO10 [ ]
Program Educational Objectives (PEO): PEO1 [ ] PEO2 [✓] PEO3 [ ]
Complex Engineering Problem (CEP): Research-based [ ] Design under constraints [ ] Modern tools [✓] Startup/Incubation scale [ ]

Declaration

We declare that the above information is true to the best of our knowledge.
